Unbeatable Protection Against the  
Worst That the Weather Can Throw at It.

# Dulux WeatherGuard

Dulux WeatherGuard is a premium quality, 100% acrylic latex exterior paint, designed for use on most exterior surfaces. This product is specially formulated to provide excellent weather resistance, easy application and a quick curing time, resulting in a long lasting, uniform finish. In addition, Dulux WeatherGuard forms a breathable film that allows moisture vapour to pass through, while preventing the penetration of liquid water, giving it a high resistance to blistering and peeling.

# Dulux WeatherGuard Maximum

Dulux WeatherGuard Maximum applies thick to cover hair line cracks and provide outstanding hide. Its semielastomeric properties allow the paint coating to expand and contract with extreme temperature changes, reducing the amount of cracking and peeling to the paint surface. This product is uniquely formulated to deliver long lasting protection for exterior surfaces threatened by the elements, delivering extended maintenance cycles and long-term cost savings. Over time, a surface painted with Dulux WeatherGuard Maximum will keep a newer, brighter appearance compared to conventional water-based exterior paints.

# Dulux WeatherGuard Decraflex

Dulux WeatherGuard Decraflex is a premium quality, 100% acrylic, high-coverage paint that provides long-lasting protection against the elements. Its waterproof, breathable finish resists water intrusion and allows moisture to escape, avoiding blistering. This elastomeric coating helps to fill and seal surfaces, protecting against future cracking.

## Features & Benefits

	Dulux WeatherGuard	Dulux WeatherGuard Maximum	Dulux WeatherGuard Decraflex
<b>Available Sheens</b>	Matt Satin Semi-gloss Gloss	Satin	Satin
 <b>Excellent Weather Resistance</b> protects surface against the extremes of the Canadian climate.	✓	✓	✓
 <b>Excellent Gloss &amp; Colour Retention</b> paint resists fading and maintains a long lasting uniform finish.	✓	✓	✓
 <b>Excellent Adhesion</b> to a wide variety of substrates.	✓	✓	✓
 <b>Low Temperature Application</b> extends the painting season.	✓	✓	✓
 <b>One-Coat Coverage.</b> Superior coverage with just a single coat, when applied over previously painted surfaces that are similar in colour.	✓	✓	✓
 <b>High Build</b> applies thick to cover and bridge hair line cracks preventing moisture penetration.		✓	✓
 <b>Semi- and Fully Elastomeric Properties</b> allow the paint to expand and contract with extreme temperature changes reducing the amount of cracking and peeling.		✓	✓
 <b>100% Acrylic</b> paint forms a breathable film that resists blistering and peeling caused by moisture.	✓	✓	✓
 <b>Excellent Resistance to Wind-Driven Rain.</b> Performs even in severe environments which can extend the painting cycle.			✓
